KidneyTalk® is life saving

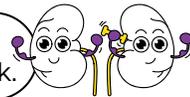

March is kidney month!
So we're spilling the (kidney) beans.

You have two beans.
Not the chili kind. The overachieving kind.

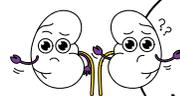

These little beans work hard.
Like... really hard. Maybe it's time we gave them a little attention back.

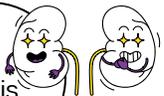

They're basically your body's chemistry lab.
They decide what stays. What goes. No drama. All before you've had coffee.

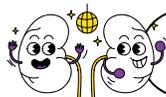

Silent Overachievers.
Kidney disease often whispers... long before it shouts. 1 in 7 adults may have it—and not even know.

Early testing = fewer surprises and more options.
No surprise plot twists.

Why is Studio Hope Boutique talking about kidneys?
Because cute outfits + life-saving awareness is kind of our thing. Shop. Share. Start the convo.

Tell your friends, your group chat... tell anyone with beans.
(Which is... everyone. Their beans will thank you.)
